Description

The new Pull Print feature of InfoPrint Manager for AIX and InfoPrint Manager for Windows is an optional feature that works with the InfoPrint Manager InfoPrint Select client with LDAP authentication. The Pull Print feature causes authenticated jobs sent to InfoPrint Manager to be held in the InfoPrint Manager print server until the user requests them to be released by authenticating himself or herself at the printer. Once the user has authenticated at the printer and selected the jobs to be printed from a list on the printer console, InfoPrint Manager releases the requested jobs and promotes them to print.

Together, InfoPrint Select with LDAP authentication and the Pull Print feature of InfoPrint Manager offer significant benefits over traditional distributed departmental printing.

- Each job can be recorded into InfoPrint Manager's accounting log with the users' unique identifying information in the *authenticated-logon* attribute field, so that charge-back for print can be done with great accuracy at the user level. This benefit can be realized with InfoPrint Select and LDAP authentication, even if Pull Printing is not used.
- Jobs that are never authenticated and selected for print are deleted from InfoPrint Manager after a specified time, so printer supplies and paper are not wasted on jobs that are never picked up.
- Since the user will usually be standing at the printer when his job is released by InfoPrint Manager, pull print printers can be configured to print without header pages, thus saving the cost of a banner page for every job.
- Printout can be more secure than with standard distributed print to shared printers, since each user will be standing at the printer when his or her job is released, eliminating the opportunity for inadvertent retrieval by another user, and discouraging browsing of uncollected output.

System Configuration

The Pull Print feature of InfoPrint Manager for AIX V4R3 and InfoPrint Manager for Windows V2R3 is available for ordering with InfoPrint Manager for AIX PTF U110001 or InfoPrint Manager for Windows PTF U110002 applied to the base product. Base InfoPrint Manager must be at these service levels to install and use the Pull Print feature. Pull Print works only with InfoPrint Select and LDAP authentication, and LDAP security enabled. The InfoPrint web server and Pull Print feature must be installed and enabled.

Printers Supported

The Pull Print feature of InfoPrint Manager works in conjunction with a new Ricoh ELP NX client for InfoPrint Manager, running at a supported printer model. This client communicates with the InfoPrint Manager server using a web application. The following Ricoh printer models are supported with PTF U110001 and PTF U110002:

RICOH Aficio MP 5001

RICOH Aficio SP C431DN

RICOH Aficio MP C5501

RICOH Aficio MP C6501SP

Individual devices may require a microcode change to support Pull Print. Contact your Ricoh representative to find out more.

Compatibility

The Pull Print feature is new to InfoPrint Manager for AIX and InfoPrint Manager for Windows as of InfoPrint Manager AIX PTF U110001 and InfoPrint Manager WIN PTF U110002. There are, therefore, no backward compatibility issues.

Key Prerequisites

InfoPrint Manager for AIX V4R3 with PTF U110001, or

InfoPrint Manager for Windows V2R3 with PTF U110002

The InfoPrint Manager Web Server (shipped with InfoPrint Manager on a separate CD)

An LDAP Server (not provided) running in an InfoPrint Manager-supported AIX or Windows environment

Accessibility by people with disabilities

Base InfoPrint Manager accessibility capabilities and characteristics apply to this feature.

Maintenance Service Offerings

InfoPrint Solutions includes one year of Software Subscription and Support with the initial license acquisition of each program acquired. The software maintenance agreement does not require customer signatures.

While covered under the terms of the software maintenance agreement, InfoPrint Solutions provides you assistance for your routine, short-duration installation, usage (how to) questions, as well as code defect support and access to PTF updates, releases, and versions of the program.

InfoPrint Solutions provides assistance via telephone and, if available, electronic access, only to your Information Systems (IS) technical support personnel during normal business hours (published prime shift hours) of your InfoPrint Solutions support center. This assistance is not available to your end users. InfoPrint Solutions provides Severity 1 assistance 24 hours a day, every day of the year. For additional details, consult the InfoPrint website at:

http://www.infoprint.com/internet/wwsites.nsf/vwwebpublished/sm_contracthome_us

Software maintenance does not include assistance for the design and development of applications, program modifications, print data-streams; your use of programs in other than their specified supported operating environment, or failures caused by products for which InfoPrint Solutions is not responsible under this agreement.

InfoPrint Manager V4R3 for AIX and InfoPrint Manager V2R3 for Windows are covered by the Agreement for Acquisition of Software Maintenance This agreement applies for subscription and support (also referred to as software maintenance), when purchased with the software product or as a subsequent renewal of software maintenance.

Limited Warranty

InfoPrint Solutions warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. InfoPrint Solutions does not warrant uninterrupted or error-free operation of the program or that InfoPrint Solutions will correct all program defects. You are responsible for the results obtained from the use of the program. InfoPrint Solutions may provide you with access to databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. Consult the InfoPrint Solutions Software Support Handbook for further information at
