## **RICOH TotalFlow DocEnhancer Postal Enablement feature**

---

**Note: Added French, Italian, German, Spanish, and Japanese language support on June 1, 2014**

### **Postal Enablement Feature Description**

---

RICOH TotalFlow DocEnhancer, a plug-in to Adobe Acrobat Professional, allows you to visually define and display enhancements on fully composed PDF files. TotalFlow DocEnhancer is a smart and intuitive product that allows print providers to quickly enhance PDF files to streamline the production process.

With this release, TotalFlow DocEnhancer introduces the new Postal Enablement Feature.

Mail is expensive. The cost of preparation, materials and postage is high and going higher. The vast share of the cost results from inefficiencies, incorrect addresses, wasted postage and inability to qualify for the deepest postal discounts. With manual mail processes for fully composed documents, however, it's difficult if not impossible to shift gears and address costly bottlenecks—especially as mail volumes grow and postal regulations and tools become more complex.

The new RICOH TotalFlow DocEnhancer Postal Enablement Feature allows users to manually select and export addresses from fully composed PDF documents and send to 3rd Party Postal Optimization software.

Users can then manually import and apply the cleansed and sorted address to the PDF. The address information can be optimized by software provided by Bell and Howell's BCC Mail Manager or TEC Mailing Solutions, or other US or non-US based postal software for address cleansing, suppression and sorting.

RICOH TotalFlow DocEnhancer Postal Enablement Feature has the capability to allow users to reduce postage costs

### **Announce and General Availability Dates**

---

**Planned Announce Date: March 26, 2014**

**Planned Availability Date: March 28, 2014**

## New Item Numbers

---

Item	Description
