Subject: TotalFlow Print Manager version 4.1.2 Release	Prepared by: Mike Simpson, TotalFlow Development Project Manager
From: Production Print Business Group – Printing Systems Software	

Classification:	☐ Troubleshooting ☐ Mechanical ☐ Paper path ☐ Product Safety	☐ Part information ☐ Electrical ☐ Transmit/receive ☒ Other (Release/Patch)	☐ Action required ☐ Service manual revision ☐ Retrofit information ☐ Tier 2

SYMPTOM/DESCRIPTION – 4.1.2 Release

CAUSE – n/a

SOLUTION/DETAILS

The 4.1.2 release is a follow on point release to the English only 4.1.0 release from April 2016. 4.1.2 includes translations for French, Italian, German, Spanish, Dutch and Japanese. The following new features from 4.1.0 are included:

Feature	Benefits
New, high speed database	The new database enhances the installation performance, removes errors and provides higher performance.
Generic Printer Support	With version 4.1, we will offer the ability to connect to many PostScript printers available regardless of the vendor. This support will include most finishing and tray options. The connection requires Ricoh personnel to operate the feature mapping tool if the printer model has not previously been mapped. Please see Printer Connector read me file for details.
Drag and drop file submission	Version 4.1 also includes the ability to drop PDF files onto the interface to create a new job in the system. This increases productivity, reducing the touch points required for jobs.
Multiple file operations	With version 4.1, it is now possible to select multiple files, right click, and perform many of the common operations offered. This reduces operator engagement time, improving efficiency.
Due date tracking	In PM 4.1, we now track the due date assigned to a job and highlight jobs at risk. This increases operator comfort and awareness, while reducing the chance of missing a deadline.

See the NPLI for additional details.

The .iso files include full installers and documentation.
