
TotalFlow Supervisor V1.3

Overview and Description

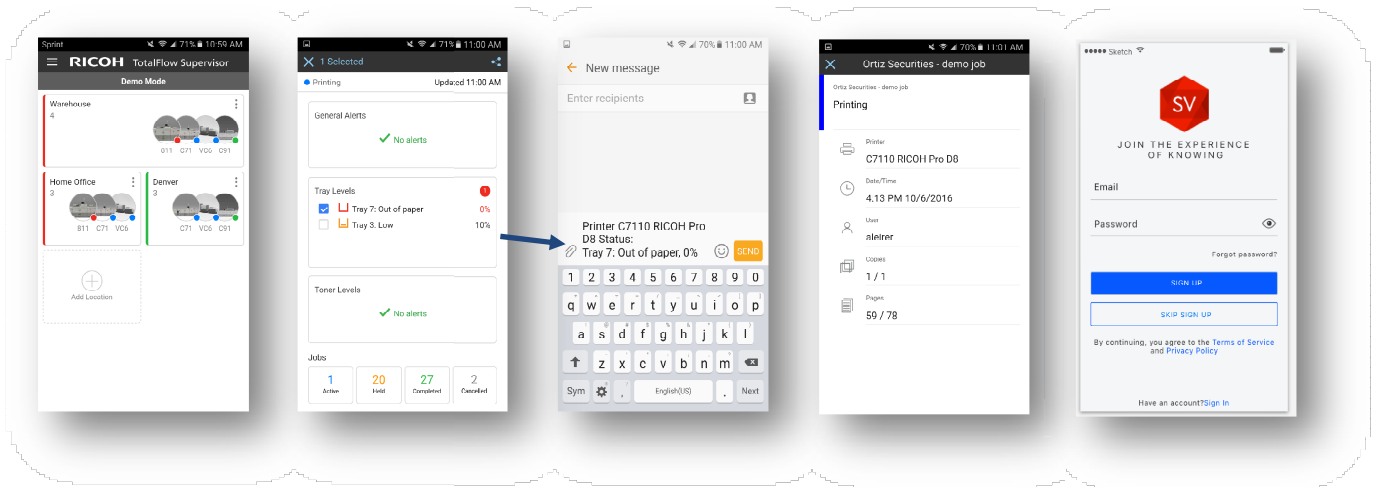

RICOH TotalFlow Supervisor is a mobile application for operators, supervisors and managers of production print environments. RICOH TotalFlow Supervisor makes it possible to access and share information about the status of network attached printers and jobs, presented in a useful, easy-to-read mobile format.

Final Release

The final release for TotalFlow Version 1.3 is September 15, 2017.

Enhancements in this Version 1.3 Release

- Sign up for a Supervisor cloud account to save app settings.
- Synchronize Supervisor settings between multiple devices using your cloud account.

Existing Features

- Define and view printers by groups and manage a large number of printers across multiple locations.
- Utilize the camera on the device to apply a custom image for each printer, select an image from the photo gallery on the device, or chose from a selection of Ricoh provided images.
- Select alerts and share those via text messaging or email with contacts on the device. Message is pre-populated with the device name and alert status.
- Preview job information including time submitted, number of copies and pages.
- Translation support for French, Italian, German, Spanish, Dutch and Japanese
- Android and IOS tablet Support
- A demonstration of the Supervisor function is included with the product
- Enhanced Job Messaging Format (JMF) to obtain information from printers/controllers that do not provide the information via an SNMP-based interface.

At-a-glance

- Enables mobile monitoring of printing devices and jobs
- Leverages simple to use user interface
- Connects operations managers and their printers wherever their work takes them
- Works with non-Ricoh printers, although support levels may vary.
- Cuts downtime by empowering print operations managers to quickly identify and solve problems
- Lays groundwork for future innovations in mobile print shop management as updates roll out
- Provides above capabilities via no-charge, easy to download app for iOS and Android
- Requires no additional hardware or software to function
- With device synchronization users can be mobile while still connected to their network

Customer Responsibilities

- Downloading and installing the RICOH TotalFlow Supervisor mobile application from the appropriate download site for their device; either Apple App Store or the Google Play Store.
- The customer's device must have wireless access on the same network as their printers in order to communicate with the devices.
- The customer must correctly input the printer's unique Internet Protocol (IP) address.
