Model: • TotalFlow Prep D3E869 (RAC) • TotalFlow Prep D3E870 (RE) • TotalFlow Prep D3E871 (RJ)	Date: 09/14/2018	No.: Prep4.3.3

Subject: TotalFlow Prep 4.3.3 Release	Prepared by: Terry Medearis, TotalFlow Development Project Manager
From: Production Print Business Group - Printing Systems Software	

Classification:	☐ Troubleshooting ☐ Mechanical ☐ Paper path ☐ Product Safety	☐ Part information ☐ Electrical ☐ Transmit/receive ☒ Other (Release/Patch)	☐ Action required ☐ Service manual revision ☐ Retrofit information ☐ Tier 2

SYMPTOM/DESCRIPTION – 4.3.3 Release
CAUSE – New product release
SOLUTION/DETAILS

The 4.3.3 release is a minor new release in the 4.3 series that adds support for the much-requested color and b/w split printing. It is now very easy to select color pages when connected to a color printer, and edit the selection if desired, print needed copies of the color pages, insert them into a b/w printer's inserter, and then print the job to the b/w printer and have the color pages automatically inserted. This greatly optimizes cost per copy, which is especially valuable on high page count jobs.

Printer Connector 8.3.68 is also built into this release which adds support for the Pro 72x0 family of printers with GW. Please see the Printer Connector release for details.

Important Note! - A new license, free to customers on maintenance, is required when upgrading from a version older than 4.3.0. The installer strongly emphasizes this also. On upgrade, Prep will be non-functional without this new license so please make sure this is provided with the update.
