Classification:	☐ Troubleshooting	☐ Part information	☐ Action required
	☐ Mechanical	☐ Electrical	☐ Service manual revision
	☐ Paper path	☐ Transmit/receive	☐ Retrofit information
	☐ Product Safety	☒ Other (Release/Patch)	☐ Tier 2

SYMPTOM/DESCRIPTION – 4.3.3 Release

CAUSE – New product release

SOLUTION/DETAILS

The 4.3.3 release is a follow on to our 4.3.2 release and adds a few features or changes needed in the market, plus the latest Printer Connector update. It remains an option for existing users as before.

Feature	Description
JDF/PDF now accepted in any hot folder	This feature allows the submission of a single PDF with Ricoh conforming JDF content to be submitted into any configured hot folder, allowing use of independent workflows.
Keep job order when moving groups of jobs	This update now retains the order when multiple jobs are selected and moved from one workflow to another.
Support output to Ultimate Bindery	When using the configured Advanced Imposition, it is now possible to indicate a hot folder in an external Ultimate Bindery installation for the imposition information to flow to, as part of a workflow. This allows for instant configuration for all finishing equipment support by Bindery.
HTTPS support extended	Support for HTTPS is now possible through configuration. See documentation for details.
Merge jobs	This feature allows the merging of common features by multiple selection of jobs. Please see documentation for limitations. Intended for use for collecting many small jobs or chapters of larger jobs. Does support media exceptions and retains many other features.

Model: • TotalFlow Production Manager D3E867 (RE)	Date: 03/08/2019	No.: PRODM4.3.3

Key features and benefits are:

• Updated Readme and About Box on UI
• The .iso files include full installers and documentation.

SIGNIFCANT FIELD ISSUES ADDRESSED

• Only minor issues resolved.   No significant issues were present.
