© 2019 Ricoh Company, Ltd. All rights reserved.

The Programs listed below are licensed under the following terms and conditions in addition to those of the applicable license agreement. This document is part of the Documentation and Confirmation of Permitted Usage under the Ricoh Software License Agreement.

Program Name: RICOH AFP MERGE

Program Number: 5876-W08

Authorization for Use on Home/Portable Computer: You may not copy and use this Program on another computer without paying additional license fees.

Limited Use Rights for Other Ricoh Programs

If You acquired this Program as part of another Ricoh Program ("Principal Program that lists this Program under "Other Ricoh Programs," You received this Program only in support of the Principal Program and Your rights to use this Program will be limited by the license of the Principal Program. Please contact Your Sales Representative if You wish to acquire a separate license to this Program not limited by the Principal Program's license terms.

Specified Operating Environment

The Program's specifications and specified operating environment information may be found in documentation accompanying the Program, if available, such as a read-me file, or other information published by Ricoh, such as an announcement letter. You agree that such documentation and other Program content may be supplied only in the English language.

Production and Non-Production License Terms

STANDARD LICENSE FOR PRODUCTION USE

A production environment is an installation that is available for final products to be created on the system. Production environments drive printers and/or are doing productive work in the creation and management of data for end user consumption. You must have a separately charged license and appropriate Proof of Entitlement for each copy of the Program you run, both in production and non-production. This applies regardless of whether the Program copies run on separate machines or within logical partitions, virtual machines, or any other device which allows the execution of multiple copies within a single machine.

RESTRICTED LICENSE FOR NON-PRODUCTION USE

A non-production environment is an installation that is available when the primary production environment fails, such as a disaster recovery environment. Ricoh provides a restricted license which covers the following categories of backup/failover/recovery/development installation:

- Backup

In this environment, the Program is installed on a backup server but is not running, and customers are NOT required to purchase additional restricted or production

licenses.

- Standby

In this environment, a copy of the Program is maintained on a separate server at all times. These systems are configured for disaster recovery purposes. If the primary instance of the Program fails, the standby instance is activated to act as the new primary instance, and customers are NOT required to purchase additional restricted or production licenses.

- Failover

In this environment, the Program is configured in a cluster and one instance of the Program acts as the primary instance. If the primary instance fails, one of the other instances in the cluster acts as the primary instance. Customers are required to purchase a production license for the primary instance and a restricted license for each secondary instance that is installed and running. Usage for such restricted license is limited to a single secondary instance.

- Development

In this environment, the Program is installed and running, but it is used to develop other applications, customizations, and processes that interact with it; no final products are created on the system. Any person doing development work using the software must be licensed. You must have a separately charged license and appropriate Proof of Entitlement for each copy of the Program you run. This applies regardless of whether the Program copies run on separate machines or within logical partitions, virtual machines, or any other device which allows the execution of multiple copies within a single machine.

- Test/Staging

In this environment, the Program is installed and running and is used by customers and/or Ricoh representatives to verify that new or customized code runs properly. You must have a separately charged license and appropriate Proof of Entitlement for each copy of the Program you run. This applies regardless of whether the Program copies run on separate machines or within logical partitions, virtual machines, or any other device which allows the execution of multiple copies within a single machine.

The above RESTRICTED LICENSE FOR NON-PRODUCTION USE terms apply to the following features and their associated maintenance when they are purchased and installed with the Program.

Item	Item number
RICOH RESTRICTED USE AFP MERGE	5876-W08-R0001

Unless Restricted License for Non-production Use features and associated terms apply, the Program and all other features are licensed under the above STANDARD LICENSE FOR PRODUCTION USE.
